

TARGET To compare and classify angles.

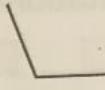

Examples

right angle

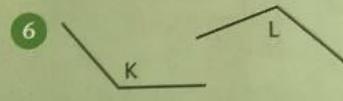

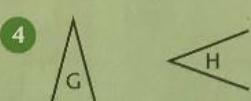

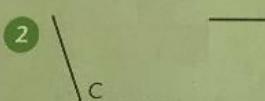

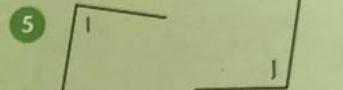

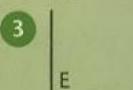

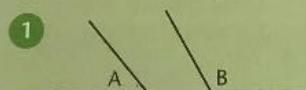

acute angle
less than a
right angle

obtuse angle
greater than a
right angle

A

Write down the larger of each pair of angles.

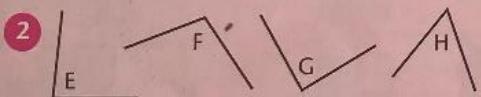

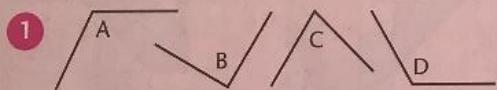

7 Decide if each of the above angles A-L is:

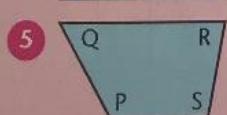

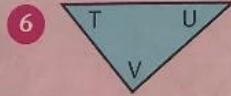

- a) a right angle b) less than a right angle c) greater than a right angle.

B

Write each group of angles in order of size, smallest first.

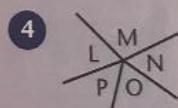

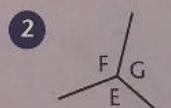

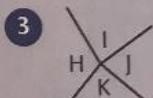

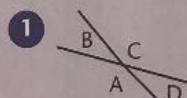

Place the angles in each shape in order of size, smallest first.

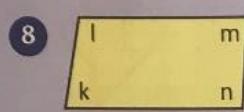

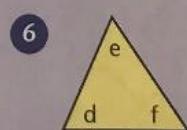

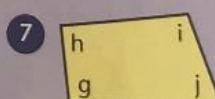

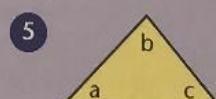

8 Decide if each of the above angles A-Z is:
a) a right angle b) acute
c) obtuse.

C

Place the angles meeting at each point in order of size, smallest first.

Place the angles in each shape in order of size, smallest first.

9 Decide if each of the above angles A-P and a-n is:
a) a right angle b) acute
c) obtuse.
